

CROP+™

Foliar Nutritional Supplement

Developed with Cytozyme's proprietary technology, CROP+ is a biologically derived nutritional product designed to support plant tolerance to abiotic stress, improving yield and quality of crops. Its multiple modes of action and multi-disciplinary approach help plants treated with CROP+ perform better.

CROP+

- Supports the natural genetic expression of plants
- High antioxidant activity reduces the effects of abiotic stress
- Aids plant metabolism at critical stages of development which determine the yield and quality of the crop

CROP+ Performance

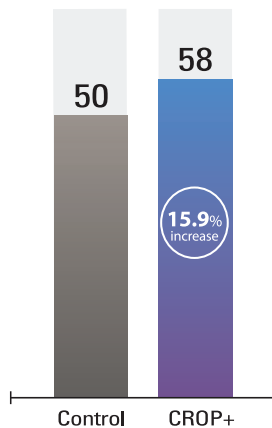

- Improved abiotic stress tolerance¹
- Increased photosynthesis²
- Increased yields³
- Improved uptake of nutrients through the root development⁴

CROP+ Field Results

Higher Yields — CROP+ produced, on average, 19% higher yield than other commercial products. CROP+ increased photosynthesis by an average of 16% in field trials. Treated plants absorbed more nutrients through the roots and reduced damage caused by abiotic stress, increasing soybean yields by 15.9%.

CROP+ Increased Soybean Yield (bu/A)

CROP+ Increased Nutrient Uptake Through Corn Roots

CROP+™

Foliar Nutritional Supplement

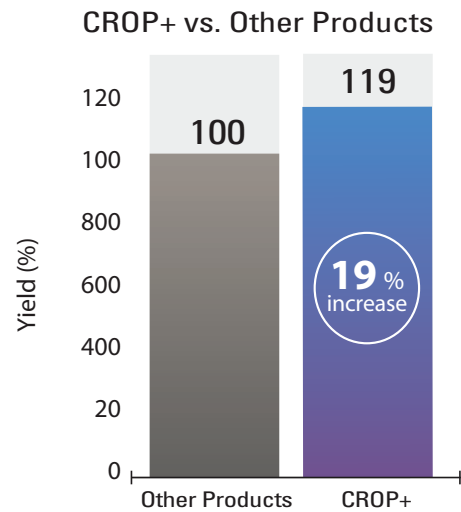

CROP+ Research Results

Environmental stress including temperature and moisture extremes suppress nutrient uptake through the roots and cause oxidative stress. Foliar applied CROP+ supports activation of enzymes involved in control of reactive oxygen species protecting cells against oxidative stress.

CROP+ has 22 times higher antioxidant activity than other products.

Application:

CROP+

Method of Application

Foliar applied

Corn, Milo, Millet, Sorghum: one application at 6 to 8 leaf stage

Soybean: two applications, 8 fl oz per acre at pre-bloom and again at pod-set stage

Cotton: four weekly applications starting at the beginning of pinhead square

Rate of Application

Corn, Milo, Millet, Sorghum: 8 fl oz per acre (600 ml per hectare)

Soybean: 8 fl oz per acre (600 ml per hectare)

Cotton: 4 fl oz per acre (300 ml per hectare)

(See product label for details)
